

Quest Engineering QS 250 - 2 way Speaker System

Based on the broad experience of Audio Engineers, DJ's and Musicians, the design team at Quest Engineering combined knowledge and practical solutions with the latest in manufacturing technology to create precise driver and design combinations that will deliver optimum results in both live and prerecorded music applications.

The QS Speaker System Range delivers exceptional bass response along with high frequencies that supply a balance of vocal intelligibility without instruments sounding harsh.

Quality Quest designed and manufactured components and horn flare optimise performance without the need for sophisticated processing electronics.

Permanent installation of the QS 250 is easy with the versatile pan/tilt bracket for vertical or horizontal installation. QS 250 HF horn can also be rotated 90 degrees for horizontal installation without HF compromise.

Professionals need reliability from their audio and Quest owners are protected by a 3 year international warranty.

Specifications

| | |
|---------------------|---|
| Type | 2-way bass reflex speaker system |
| Power Handling: | 250 Watts RMS 500-Watts Peak |
| Nominal Impedance: | 8 Ohms |
| Components: | 1 Woofer 12" (300 mm) 1 Compression driver 1" exit |
| Angle of Coverage: | 90 X 60 degrees |
| Frequency Response: | 55Hz - 20Khz +- 3 dB |
| Sensitivity | 95 dB |
| Max SPL: | 121 dB Nominal 124 Peak |
| Crossover: | Two way passive with protection |
| Protection: | Electronic over voltage on top end |
| Enclosure: | Injection moulded ABS |
| Connectors: | 2 XLN4 |
| Dimensions: | 430 X 310 X 690mm |
| Net Weight: | 11 Kg |
| Shipping Weight: | 16 Kg |
